AHSTAR-ASHTAR COMMAND-1

Greetings, this is Ashtar.

I am honoured to be with you, to share my perspective on planetary transformation and evolution, my perspective on your personal growth with regards to this, I will begin with sharing some historical perspective from my experience concerning your planet to what is occurring the importance of this day and that which will occur in the future perhaps.

We have witnessed your world, this beautiful planet earth for many ages, many hundreds of thousands of years indeed from your perspective it has been a very long wait to get to this point from our perspective time is a little less important nevertheless, even from my vantage point it has been a long journey for planet earth. You find yourself inhabiting one of the most interesting and challenging planets in this entire local universe, in fact I would say the most interesting why do you think there are so many visitors here from abroad. The experience of witnessing a planet experience a shift from darkness to light this dramatically is a rare occurrence, yet the shift must take place and is taking place.

The nature of its intensity & rapidity is the reason for its drama and your drama as you are being, as you are being called to expand in your awareness and become the light beings you are in a very short time. As this planet has been observed in its evolvment, my perspective is historically let us say, things proceeded along quite according to plan until that which you would refer to as the rebellion took place and those caretakers, administrators of your world and several other worlds in this local universe chose to go their own way, chose to set up their own autonomous sovereign planetary universe, for the purpose of time you could say this was around 200,000 years ago that this took place. I have been here much longer than that.

AHSTAR-ASHTAR COMMAND-1

At the time of this rebellion many beings within the ranks of the spiritual beings who were here to serve, within the ranks of the human beings that have inhabited this planet made choices as to their alignment, whether they will follow for lack of a better term we shall say; the path of darkness, though it is not intended as a judgment, or the path of light being the evolutionary spiral that has been in effect through this local universe, all universes for far longer than I am aware with only an allegiance to the creator you might say, rather than an individual manifestation of the creator so several manifestations of the creator did not like the way things where and wanted to have more power for themselves in the guise of a platform of free will, liberation & freedom in effect influence many to their own enslavement.

At the point of time that this occurred there where several years in your time that went by while those of this planet made their choices, chose their alignment and many, many chose to remain in honour of the divine Creator of the light, many chose otherwise.

As free will is the rule in the creators' universes it was not highest wisdom or decided to simply eradicate those of darkness but rather let their choices bear fruit, that they might chose and realize the folly of that path. So, a certain amount of time has been allowed for this, that time is now up!

The decision was made to sever the light circuits of this local system the system that did choose to fall under this sway of this rebellion, so that rebellion would not spread to other innocent spheres, you could call it a quarantine where the virus was left to run its course were those who have chosen of free will as a learning experience to follow that path, for whatever reason the reason is not known to me I am assuming the masters, the being who created all may know why this has occurred.

AHSTAR-ASHTAR COMMAND-1

Over the course of this past 200,000 years or so it has looked very dark for this planet's survival it has at times been a close decision to whether to leave it to self-destruct or to attempt by other means to influence a turning of the tide of consciousness. Through the course of this time many have been granted the opportunity as volunteers to incarnate here you may be among them as light workers to assist in this process of holding and anchoring the light that human beings might evolve to the point of choosing the higher path, choosing the path of immortality, freedom & light. This is the choice before humanity currently, you have done your work in being here, you are doing your work in your awakening now as other ascended masters have mentioned in blazing the pathway into higher dimensional manifestation in the ascension process, you are teaching others and offering that as an opportunity for them. There have been several ways to volunteer, some of you have been here longer than others it is not important how long you have been here, some of you may feel a little weary at this point, some will be feeling rather energized. This might be an indication how long you have been here in this system, the system of birth & 3rd & 4th dimensional manifestations.

At the time of Sananda (Jesus - Yeshua) of Nazareth was upon this earth it was what you might call a turning point and a great blessing for this world, a doorway was opened to go onto the next step of the evolutionary ladder options were made available that were not previously available. Options to all beings in bodies and out of bodies in this planetary system.

At the departure of Sananda at his ascension and afterwards a dispensation was granted symbolized by the Pentecost, that is the holy spirit descent of the holy spirit into the hearts of all men & women of this sphere, as an open doorway as an access by which human beings could have a deeper contact with source.

AHSTAR-ASHTAR COMMAND-1

With that love it was and remains an energy of love, compassion & brotherhood selfless service it is an energy you carry within you as light workers, to great effect.

That bestowal experience that manifestation of Sananda manifesting here opened the doorway for the preparation for this time that you find yourselves in so gloriously, a time which this day symbolizes a new dispensation that of the Melchizedek energies representing another 1/3 of the trinity experience we have been speaking for some time about spiritual empowerment and new energies coming through to you that will assist you in strength, power & wisdom your ability to actually manifest more spiritual power and clarity I think the Melchizedek energies as they have been called relate and are directly a source of this empowerment for you.

I am telling you this to open your hearts and just as a perspective to help you to frame this experience in your consciousness, in your minds eye, the way that these energies feel to you are unique just as you are a unique reflection of spirit and that is holy and sacred to each of you.

Let me say the time that we have been waiting for when the planet will attain its spiritualization its ascension is now well underway these energies that come through at this time are at a very powerful dispensation from the source of this universe and it is our hope that after this experience, in the days and weeks and years whatever time you have left here as lightworkers in your bodies that you will have an easier time of it, that your ability to remember who you are and to act from that point and to manifest and to channel spiritual grace & presence will be enhanced greatly.

So, there is my little historical discourse for you, all done without a blackboard. Don't be alarmed if you can't remember it, it is just a factual presentation.

AHSTAR-ASHTAR COMMAND-1

You have all had your own unique history within the history that I have given, you have your own unique sources the Ashtar Command and Angelic hosts, the Melchizedek order and many, many other orders of beings fulfilling many and varied duties and you all have your own points of origin, in spirit all is one let me say, there is great joy this day.

I would like to serve you in any way I can on this day. You may ask me any questions you may have. I remain with you for a time,

Question - What will transform for the inner being & outer environment in the future?

Answer – On the inner you will be receiving greater & greater infusion of spiritual presence from source. It is to say if you were firing on 5 cylinders you will be firing at perhaps 6-7 cylinders and this energy will affect you in however it does as you are all uniquely different. It will be an opportunity for you to obtain self-mastery and to actually and in a very real dynamic way feel yourself as a Master feel as you are a powerful being, feel where you are a channel of light and to allow this energy to come through you in your meditations and channellings and everyday lives. You will be feeling a closer contact with your higher self and guides. This activation has kicked up a lot of dust. It is emotional dust mostly it will be blown away like fairy dust. So, to speak once the dust has moved from your eyelids you will be able to see more clearly. Another inner and outer ability will be able to manifest more clearly, more strongly, more courageously, more fiercely that of which you desire to achieve. That which comes to you as guidance and feelings from your spirit will be more easily manifested into the 3rd dimension of manifestation.

AHSTAR-ASHTAR COMMAND-1

(Continued Answer)

On the outer you could say, the outer relating to planet earth experience there will be apparent confusion, chaos, perhaps an increase of purifications for the planetary body known as earth changes a great deal of this can be lessened by your active participation as it has been in the past. So, when you channel a great deal of light through a system, the system is polarized & purified. The darkness becomes more contracted the light becomes more expanded & brilliant. Those aligned to the light will become more brilliant & glowing, those aligned to the darkness will become more contracted & have a more difficult time that also goes for systems on the planet, economic systems, governmental systems, the systems within your bodies your emotional systems where there are remanence of limitation you have absorbed in belief systems from previous incarnations or this lifetime these will be cleared away more dramatically more intensely.

Ashtar: In closing I will say,

in the beginning of planet earth experience beings were much more spiritualized much more in alignment with spirit, even those beings who were mortal had very long-life spans, the darkness, chaos & confusion have interpenetrated the earth to the extent that human beings have excepted and recently a very short life span, though this is turning around as you can witness many are living longer years, are also appearing younger and can live quite a bit longer than their predecessors.

So, you could say that grace of spirit has the effect of increasing longevity & health in general.

The veils are now being removed!

I bid you farewell, good day!

Transcript (pdf) for personal sharing for personal growth they are not for sale or to be monetized as they are the wise words of ascended Masters & should only be shared to enhance the lives of others.

: The Law of Divine Oneness

Everyone and everything are connected in the world we live in. Every thought, word, or action of ours will take effect on others. As everything and everyone is connected to each other subconsciously, we should start thinking about the good in others, and they will think about the good in you. Example: When we allow ourselves to become who we truly are, we discover our passions and want to provide happiness to others with our passions such as baking, singing, etc
